

**AMENDMENT TO THE CLAIMS:**

Please replace all prior listings of claims with that which appears below, in which Claims 18-20, 22-24 and 27-33 have been cancelled and Claims 5-15 and 21 have been amended to read as follows:

1. (Original) A container having a front display side and a rear side comprising:

- (i) a container body defining a housing into which an object or material can be placed and a mouth through which the object or material can be placed into the housing;
- (ii) a closure for the mouth of the container body for closing an object or material within the housing;
- (iii) a display board hingedly connected to the container by at least one hinge portion and having a display panel on which product information can be displayed, the display board being rotatable about at least one hinge portion between a first position wherein the display board is held in a position where the display panel faces in the same direction as the front display side of the container and in the second position the display panel faces in the same direction as the rear side of the outer container.

2. (Original) A container as claimed in claim 1 further comprising a tamper evident feature.

3. (Original) A container as claimed in claim 2 wherein the tamper evident feature is a frangible connection between the closure and the display board.

4. (Original) A container as claimed in claim 2 wherein the tamper evident feature is a frangible connection between the closure and the container body.

5. (Currently Amended) A container as claimed in Claim 2 ~~any one of the preceding claims~~ wherein the tamper evident feature is selected from the group ~~comprising~~ consisting of plugs, pins, tear-way strips or combinations thereof.

6. (Currently Amended) A container as claimed in Claim 1 ~~any one of the preceding claims~~ wherein the container has a base arranged to maintain the container in a standing position when the container is placed in an upstanding position on said base.

7. (Currently Amended) A container as claimed in Claim 1 ~~any one of the preceding claims~~ wherein the closure for the mouth of the container is a lid.

8. (Currently Amended) A container as claimed in Claim 7 ~~any one of the preceding claims~~ wherein the lid is mounted on the container body.

9. (Currently Amended) A container as claimed in Claim 7 ~~any one of the preceding claims~~ wherein the lid is mounted on the container body by at least one flexible hinge.

10. (Currently Amended) A container as claimed in Claim 7 ~~any one of the preceding claims~~ wherein the lid is a snap fit to the container.

11. (Currently Amended) A container as claimed in Claim 1 ~~any one of the preceding claims~~ wherein the display board is retained in the first position by a snap fit.

12. (Currently Amended) A container as claimed in Claim 1 ~~any one of the preceding claims~~ wherein the display board is retained in the second position by inter-engaging members.

13. (Currently Amended) A container as claimed in Claim 12 ~~any one of the preceding claims~~ wherein the inter-engaging members comprise a projection and a rim.

14. (Currently Amended) A container as claimed in Claim 13 ~~any one of the preceding claims~~ wherein the projection is on the display panel and the rim is on the container.

15. (Currently Amended) A container as claimed in Claim 1 ~~any one of the preceding claims~~ wherein the display board further comprises a stop to prevent the display board from travelling too far forward in the first position.

16. (Original) An outer container for retaining an inner container with a dispensing end and a base end, the outer container comprising:

(i) a container body defining a housing into which the inner container can be placed and a mouth through which the inner container can be placed into the housing;

(ii) a closure for the mouth of the container body for closing the inner container within the housing;

the closure having provided, on an underside thereof, a stand for receiving and gripping the base end of the inner container and being arranged for retaining the inner container upright or substantially upright relative to the underside of the closure.

17. (Original) An outer container as claimed in claim 16 further comprising a tamper evident feature.

Claims 18-20. (Cancelled)

21. (Currently Amended) An outer container as claimed in Claim 16 ~~any one of claims 16 to 20~~ wherein the lid is mounted on the container body by at least one flexible hinge.

Claims 22-24. (Cancelled)

25. (Original) A combination pack comprising outer and inner containers wherein the inner container is retained in the outer container,

the outer container comprising:

- (i) a container body defining a housing into which the inner container can be placed and a mouth through which the inner container can be placed into the housing;
- (ii) a closure for the mouth of the container body for closing the inner container within the housing;
- (iii) retaining formations on the outer container for retaining a hygroscopic element within the housing;

the inner container comprising:

(i) a container body defining a housing into which product can be placed and a mouth through which product can be dispensed;

(ii) a closure for the mouth of the container body; and the combination package further comprising a water sensitive material within the container body.

26. (Original) A combination pack as claimed in claim 25 further comprising a tamper evident feature.

27. (Currently Amended) A combination pack as claimed in claim 25 ~~or claim 26~~ wherein the outer container has a base arranged to maintain the outer container in a standing position when the outer container is placed in an upstanding position on said base.

Claims 28-33. (Cancelled)
